ABOUT ME

I'm an enthusiastic software developer eager to learn and innovate in the field. With a passion for coding and continuous improvement, I'm dedicated to mastering the latest technologies and expanding my technical toolkit. Although I'm new to the professional scene, I'm committed to contributing, collaborating, and growing within the industry. My goal is to bring a fresh perspective to each project while delivering reliable, efficient solutions that make a difference. I'm driven by enthusiasm for problem-solving and thrive on overcoming challenges, viewing each as an opportunity to sharpen my skills and deepen my expertise.

EDUCATİON

Dogus University

Electronics & Communications Engineering

2020 - 2025

WORK EXPERİENCE

BACKEND DEVELOPER   **10/2023-Present**
EMAAR TECHS

-As a Backend Developer with expertise in Node.js and MongoDB, I play an active role in software development processes within our team.
-I work collaboratively with team members to tackle challenges, ensuring we deliver reliable and efficient solutions.
-I design, implement, and optimize backend services to enhance system performance and scalability.
-Additionally, I participate in code reviews and provide constructive feedback to maintain code quality and best practices across the team
-I contribute to testing processes by writing unit tests and proactively addressing bugs to ensure code reliability and stability, helping to identify and resolve issues early in the development cycle.
-I stay updated with the latest technologies and best practices in the industry and share relevant insights with the team, ensuring our projects are developed using modern and effective methods.
